Predictive Quarterly Revenue Based on Nexus Algorithm

Developing the algorithm

- Growth rate over quarters

- Opportunity Product + Opportunity Type

- Average duration of Opportunity ID in each stage

- Zip code to validate individual hospitals (repeating hospitals with different sale cycles)

Opportunity Product + Opportunity Type

- Which product closed the most deals?

- Which type of opportunity closed the most deals?

- How does this affect future growth?

Average Duration of each Opportunity Case

- How did average duration affect the growth rate?

- Which deals had the quickest durations? Which the longest

- How will this affect future growth rate?

- Future Incorporation of Stages

Conclusion

Quarter 3 Predicted Closed Won Value:

$809725.62
